SUMMARY

Final-year Computer Engineering student (IPS) who completed a 486-hour internship at **4ITHOLDING (INNOVANOW)**, building **Seatly** for a real client: a **.NET 10 / C#** REST API, a **Next.js/TypeScript** back office and a **Kotlin Android** app, delivering 74 functional requirements across 4 Scrum sprints. In personal projects I build **serverless** TypeScript systems (Cloudflare Workers, Supabase/PostgreSQL) with automated tests and CI/CD. Developer with a designer's eye (UX/UI).

Available from November 2026 · on-site or hybrid in the Lisbon area, or remote

PROFESSIONAL EXPERIENCE

Software Development Intern (Full-Stack) — 4ITHOLDING (INNOVANOW)

07/2026 – 10/2026

Seatly: event seating and guest management platform (API, web back office and Android app) · 486 h, hybrid

- Built the solution for a real client and delivered **74 functional requirements in 4 Scrum sprints** (Jira, Confluence), with technical decisions validated by my advisor (CDO) through reviewed pull requests; handed over to the company with user and technical manuals, plus metrics (GQM) and DevOps reports.
- **.NET 10 / ASP.NET Core (C#)** REST API with **Entity Framework Core** and **LINQ**, **JWT** authentication, server-side role-based authorization (RBAC), Swagger/OpenAPI documentation and **unit tests**.
- **Next.js and TypeScript** back office (Vercel): event, company and guest management, validated CSV import and filterable audit logs with JSON diffs.
- Android app in **Kotlin and Jetpack Compose** (MVVM) with offline/online sync, QR code scanning (ML Kit, CameraX) and real-time updates via **MQTT** (HiveMQ).
- Migrated from Azure SQL to **PostgreSQL** (Neon) and from .NET 9 to .NET 10; **CI/CD with GitHub Actions**, protected **main** branch with required PRs and status checks, continuous deployment (Render, Vercel).

Founder and Developer — LBWATCHES

01/2024 – present

Custom watch brand · lbwatches.pt

- Website and catalog (since 06/2026) in **Next.js 14, TypeScript, Tailwind CSS** and Framer Motion, with mobile-first **responsive design**: ~90 models in 15 collections, a comparison tool and an interactive Creator Studio.
- **Technical SEO** (sitemap, JSON-LD), Vercel Analytics, domain and hosting; leads from organic search and WhatsApp, with no paid advertising.

PROJECTS

Flipora

2026

Personal project: automated detection of resale opportunities on online marketplaces, with real-time alerts

TypeScript · Cloudflare Workers · Next.js 16 · Supabase (PostgreSQL) · Telegram Bot API

- **Cloudflare Worker** with a per-minute cron, job dispatcher and a budget of 50 subrequests per run: monitors OLX, Vinted, Standvirtual and CustoJusto and sends alerts within **~1 min** via the **Telegram Bot API** (webhook).
- **PostgreSQL** (Supabase) with RLS, RPC functions and an alert queue with atomic claiming (FOR UPDATE SKIP LOCKED); **Next.js 16 / React 19** web app with custom login, roles, favorites, a deals board and market analysis.
- TypeScript monorepo with shared logic, per-platform circuit breaker (429/403), **automated tests** (node:test) and CI; built with **AI-assisted development**, project rules and code review.

CareSync (ASP.NET Core MVC, Angular, EF Core, SQL, Azure · academic team project): care home management with authentication, resident records, billing APIs, PDF generation and Azure deployment.

SKILLS

Backend	.NET 10, C#, ASP.NET Core Web API, EF Core, LINQ, Node.js, Java, REST APIs, JWT, RBAC, Swagger/OpenAPI
Frontend	Next.js, React, TypeScript, JavaScript, Angular, Tailwind CSS, HTML, CSS, responsive design, technical SEO
Mobile	Android, Kotlin, Jetpack Compose, MVVM, offline/online sync
Data and Cloud	PostgreSQL (Neon, Supabase), SQL Server, MySQL, Azure, Vercel, Render, Cloudflare Workers, DNS
Tools	Git, GitHub Actions (CI/CD), Jira, Confluence, Scrum, MQTT, unit testing, requirements engineering
AI	AI-assisted development (Claude, Gemini) with project rules, code review and testing
Soft skills	Rigor and attention to detail, high standards of work quality, autonomy, time management, client communication, teamwork, problem-solving and troubleshooting, entrepreneurial mindset

EDUCATION · LANGUAGES · INTERESTS

BSc in Computer Engineering — Polytechnic Institute of Setúbal (IPS)

2022 – 12/2026 (expected)

Languages: Portuguese (native) · English (fluent, C2; English for IT, Cisco) · **Interests:** modifying Seiko watches (precision handwork), which grew into my brand LBWATCHES.
