

Leonardo Barreiras

Junior Software Developer · Full-Stack (.NET · Next.js · Android)

PROFILE

Final-year Computer Engineering student (IPS) and full-stack intern at 4ITFUTURE. I built Seatly on my own, an event seating platform with a .NET 10 API, a Next.js/TypeScript back office and a Kotlin Android app, delivering 69 functional requirements in 4 Scrum sprints. Hands-on with PostgreSQL, REST APIs, JWT, MQTT and CI/CD. A developer with a designer's eye (UX/UI), focused on clean code, documentation and shipping. Available from November 2026.

EXPERIENCE

Software Engineering Intern · 4ITFUTURE

Jul 2026 – Oct 2026

Seatly — event seating and guest management platform (API, web back office and Android app)

- Built the full solution independently and delivered **69 functional requirements in 4 Scrum sprints** (Jira and Confluence).
- REST API in **.NET 10 / ASP.NET Core** with **JWT** authentication, server-side role-based authorization and Swagger/OpenAPI docs.
- Back office in **Next.js and TypeScript** (Vercel), with validated CSV import and filterable audit logs with JSON diffs.
- Android app in **Kotlin and Jetpack Compose** (MVVM), with a layered architecture, REST API integration and offline/online sync.
- Real-time updates over **MQTT** (HiveMQ) and transactional email via the **Brevo API**; migrated from Azure SQL to **PostgreSQL (Neon)** and from .NET 9 to .NET 10.
- CI/CD with GitHub Actions**, pull requests with required status checks and continuous deployment (Vercel, Render); requirements, metrics (GQM) and DevOps documentation.

Founder & Developer · LBWATCHES

Own business

Custom watch brand · lbwatches.pt

- Website and catalog in **Next.js 14, TypeScript, Tailwind CSS and Framer Motion**: ~90 models in 15 collections, model comparison and an interactive Creator Studio.
- Technical SEO (sitemap, JSON-LD) and Vercel Analytics; generates leads through **organic Google search with no paid ads**.
- Mobile-first experience with WhatsApp conversion; runs the business, brand identity and content.

ACADEMIC PROJECTS

CareSync · ASP.NET Core MVC, EF Core, SQL, Azure — Team project for care home management: authentication, residents, billing APIs, PDF generation and deployment on Azure (App Service, SQL Database, Blob Storage).

Other · Java, JavaScript, C# — Java management app (MVC, CRUD), responsive website in HTML/CSS/JS and a 2D Unity game with basic AI.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript, Kotlin, Java, SQL, C, Dart
Backend	.NET 10, ASP.NET Core Web API, EF Core, REST, JWT, RBAC, Swagger/OpenAPI, Node.js
Frontend	Next.js, React, Angular, Tailwind CSS, Framer Motion, HTML5, CSS3, technical SEO
Mobile	Android, Jetpack Compose, MVVM, offline/online sync
Data & Cloud	PostgreSQL (Neon), SQL Server, MySQL, Azure, Vercel, Render, Docker (basics)
Tools	Git, GitHub Actions (CI/CD), MQTT (HiveMQ), Brevo, Jira, Confluence, Android Studio, VS Code
Practices	Scrum, requirements engineering, testing, technical documentation, software metrics (GQM), UX/UI

EDUCATION

BSc in Computer Engineering

Instituto Politécnico de Setúbal · 2022 – 2026 (expected Dec 2026)

Courses: English for IT (Cisco), Business Continuity Management (NAU), Data Structures, Databases

LANGUAGES

Portuguese — Native

English — Fluent (C2)
